

# Six things you should know when planting a tree.

**1. Call Before You Dig** - Several days before planting, call the national 811 hotline to have underground utilities located.

**2. Handle with Care** - Always lift tree by the root ball. Keep roots moist until planting.

**3. Digging a Proper Hole** - Dig 2 to 5 times wider than the diameter of the root ball with sloping sides to allow for proper root growth.

**4. Planting Depth** - The trunk flare should sit slightly above ground level and the top-most roots should be buried 1 to 2 inches.

**5. Filling the Hole** - Backfill with native soil unless it's all clay. Tamp in soil gently to fill large air spaces.

**6. Mulch** - Allow 1 to 2 inch clearance between the trunk and the mulch. Mulch should be 2 to 3 inches deep.
