The purpose of the system development fee is to help defray the costs of past and future system improvements. Once it has been paid for a property, it will not be collected again if the service is repaired or replaced with the same size service in the future, with the exception of property where service has been discontinued for more than 5 years. Development fees for new construction are due at time of issuance of a building permit and for all others at time of connection. For new construction not served by City water, a shutoff valve is required at owner's expense.

System development charges (SDC's) for the wastewater systems are determined for an equivalent residential unit (ERU). Unless specifically provided for otherwise, SDC's for connections involving more than one ERU are determined according to the ERU's calculated for the service at the new connection. An ERU shall be defined as 250 gallons per day, normal strength (250 ppm) wastewater.

Each single-family living unit shall be defined as one ERU. Each residential unit in a multi-family structure with two or more residential units shall be considered a 0.8 ERU. ERU equivalencies for any other connection will be determined by the City using the following formula:

$$(\text{flow in gpd} / 250\text{gpd}) \times [0.38 + 0.387 \times (\text{BOD in ppm} / 250\text{ppm}) + 0.233 \times (\text{TSS in ppm} / 250\text{ppm})] = 1 \text{ ERU (but not less than 1 ERU)}$$

**Section 2.** Resolution No. 06-2019 is hereby repealed and replaced by this Resolution.

**Section 3.** This Resolution shall be effective January 1, 2021.
